Dear Visitors,

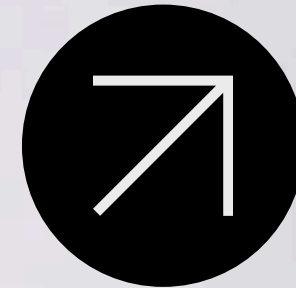

Hello and welcome!

In today's product landscape, the gap between engineering, data, and design is where the most significant value is lost or gained. My career is defined by closing that gap. From scaling product infrastructure at multinational firms to architecting AI workflows that empower both the organization and its customers, I focus on one objective: to expand the human potential of the person in front of the screen.

As you review my work, you will see a commitment to both organizational success and human empowerment. I am excited to share how my blend of systems thinking and product leadership can help expand your human potential.

Raphael Angelo Orbe

Design Technologist | Products, Systems, Data

Introduction

Raffy Orbe

Who is Raffy Orbe?

I am your team's bridge from concept to shipped

Great products live at the intersection of design and engineering, and I build in that space. My approach pairs a designer's eye with the technical fluency to prototype and ship. I bridge product vision and technical execution not just by translating between teams, but by speaking both languages. That means faster iteration, fewer things lost in handoff, and teammates who are freed up to focus on what they do best.

Why I click:

/1

Cross-functional Native

I speak the team's language and understand how each role completes the whole. Fluent in Product Manager, Project Manager, Product Designer, User Researcher, Business Analyst, Data Analyst, Software Developer, Quality Assurance Tester, and Customer/User.

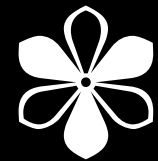

/2

Empathetic Blocker Buster

I know that I am only as great as my team. As such, I make sure that my teammates are able to do their best work through collaboration if helpful and compromise if blocked. While I aim for product perfection, I know it is an iterative process that we must go through together.

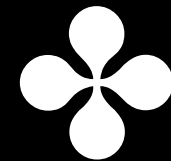

What I bring:

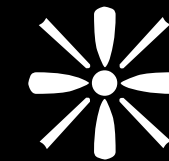

Impact-driven Product Development

Impact and purpose are essential to my work. I find ways for the team to succeed so that customers also succeed.

Frictionless Collaboration

Cross-functional silos are a reality. I learn what it's like for each team so I can bridge them together for collaboration.

Enjoyable Office Atmosphere

Fun and humor are a core part of my personality. When you hear me laughing with teammates, it means we're doing our best work.

Projects

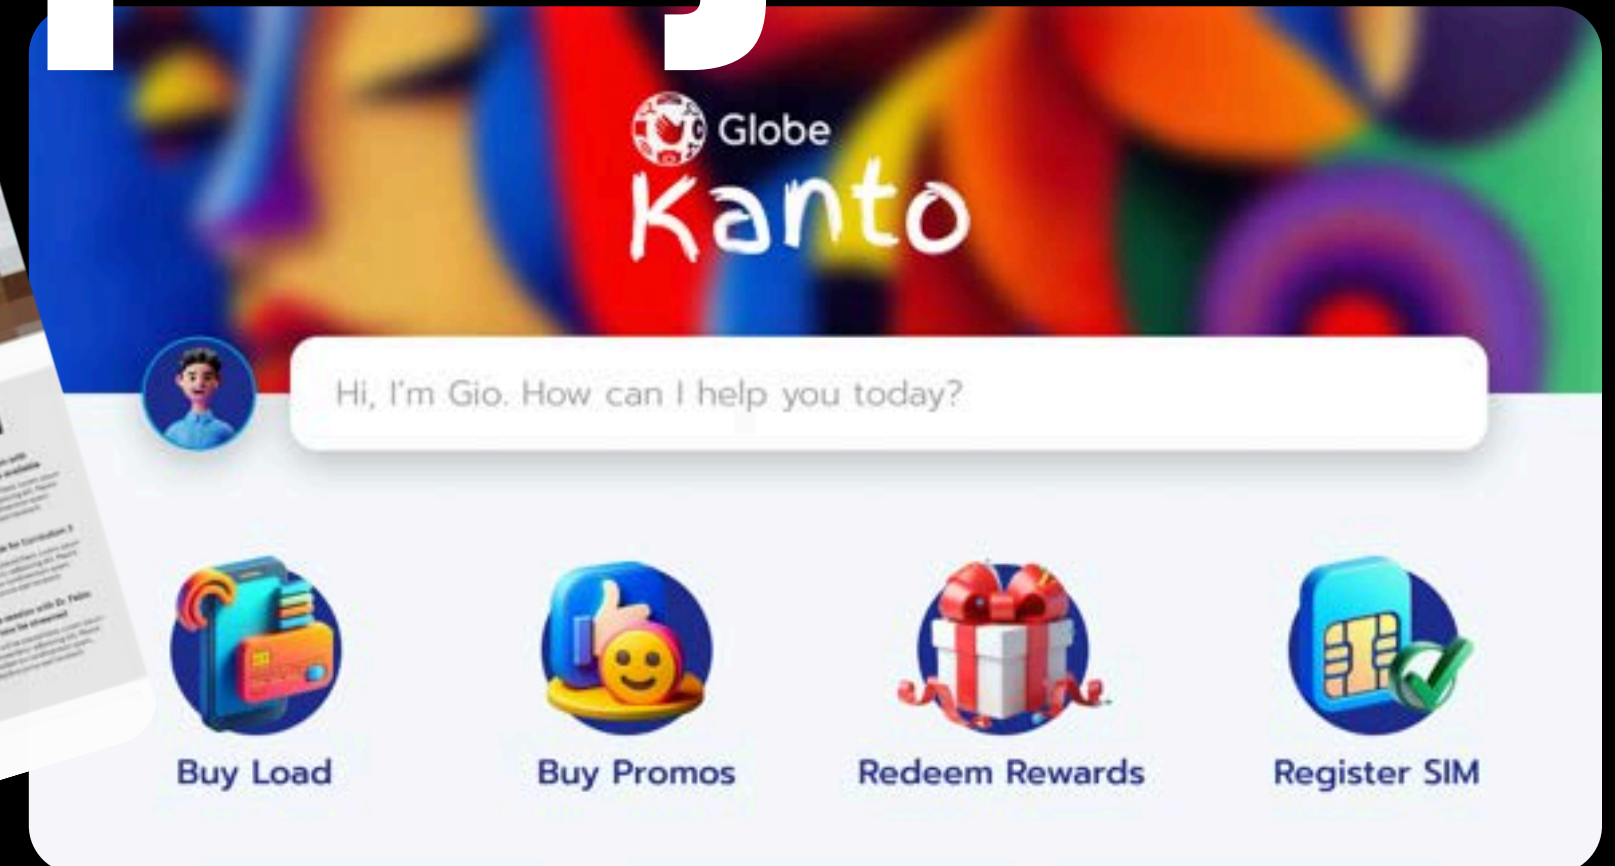

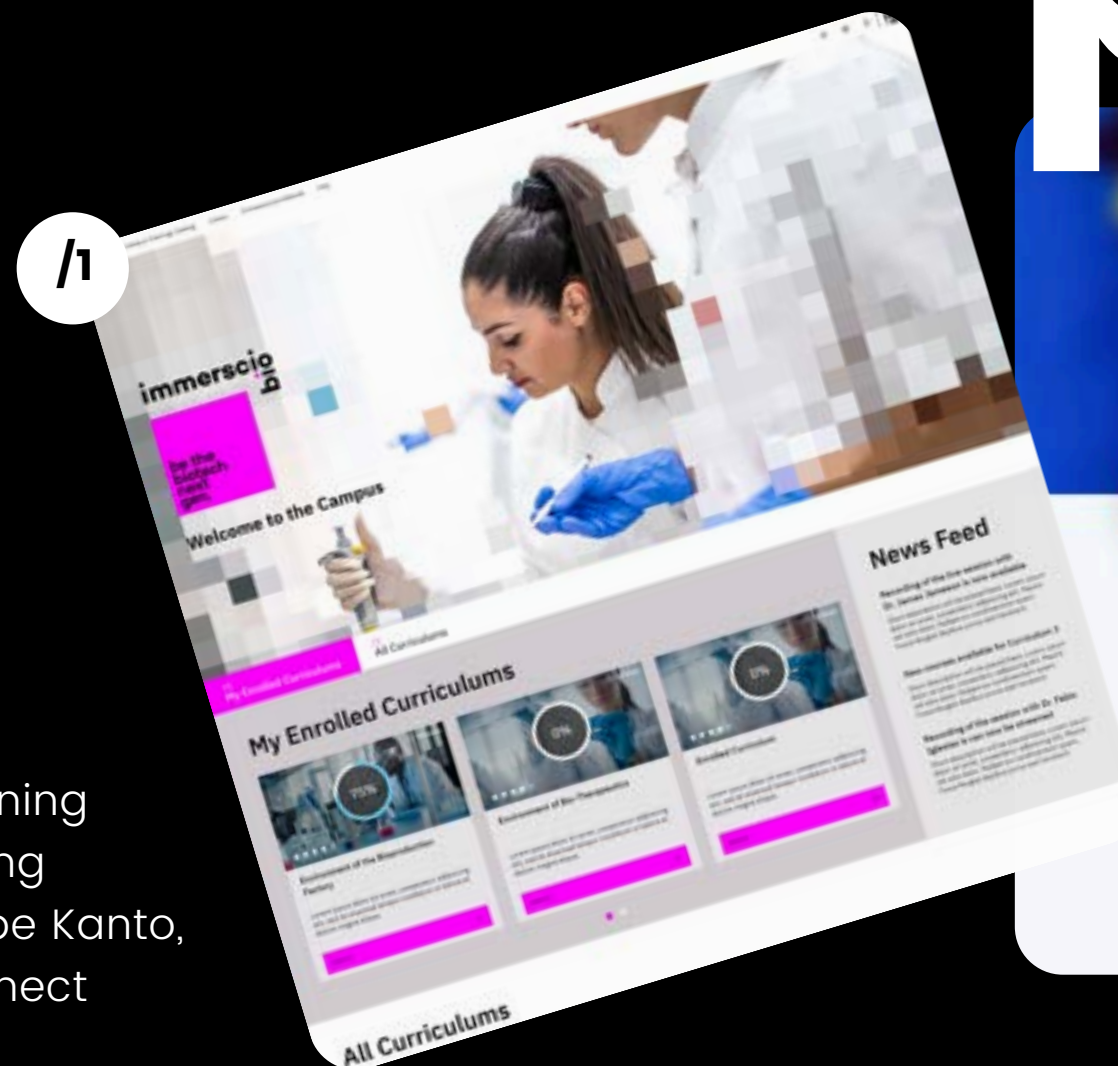

Raffy Orbe

Some impactful projects

I worked on a lot but these were the most meaningful

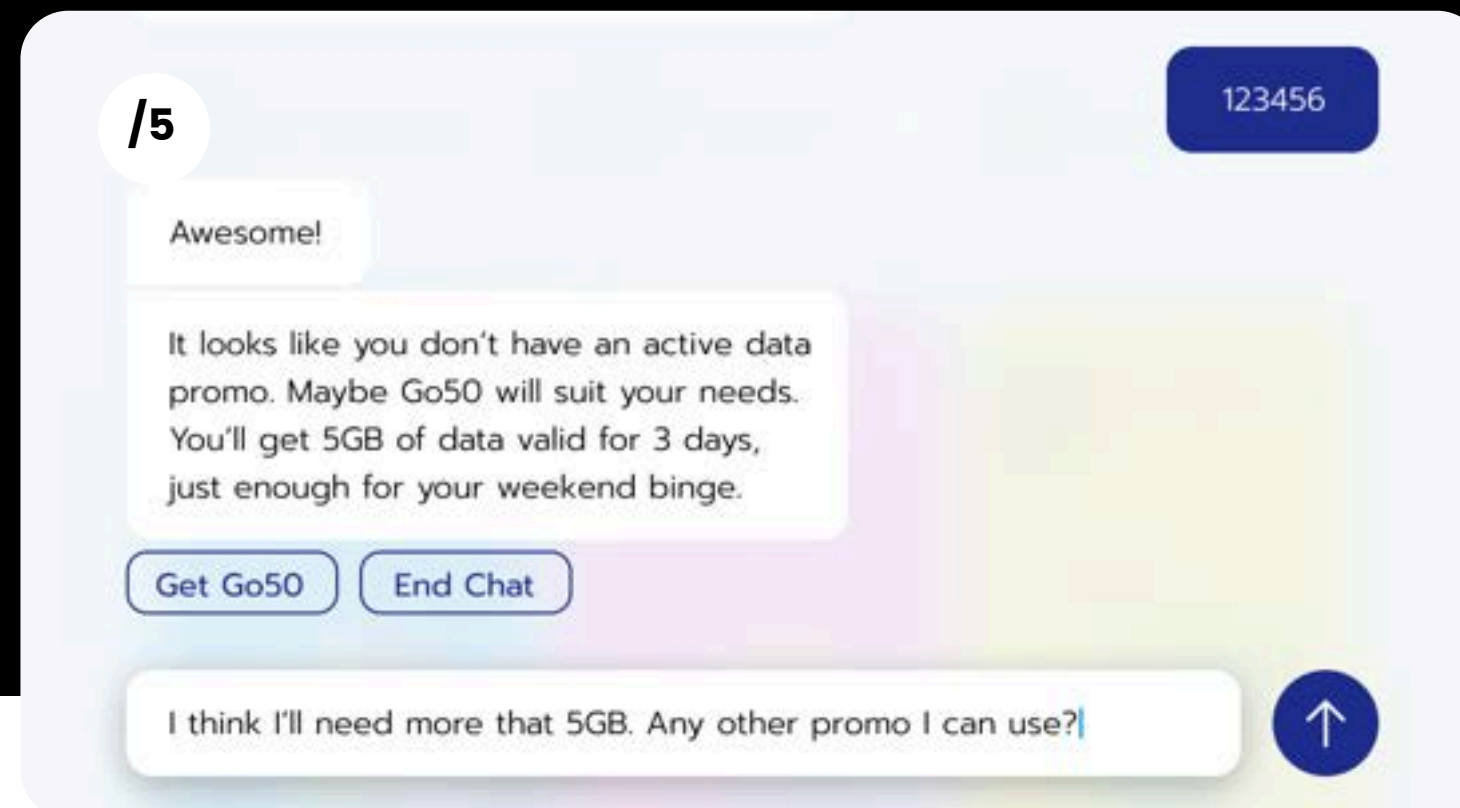

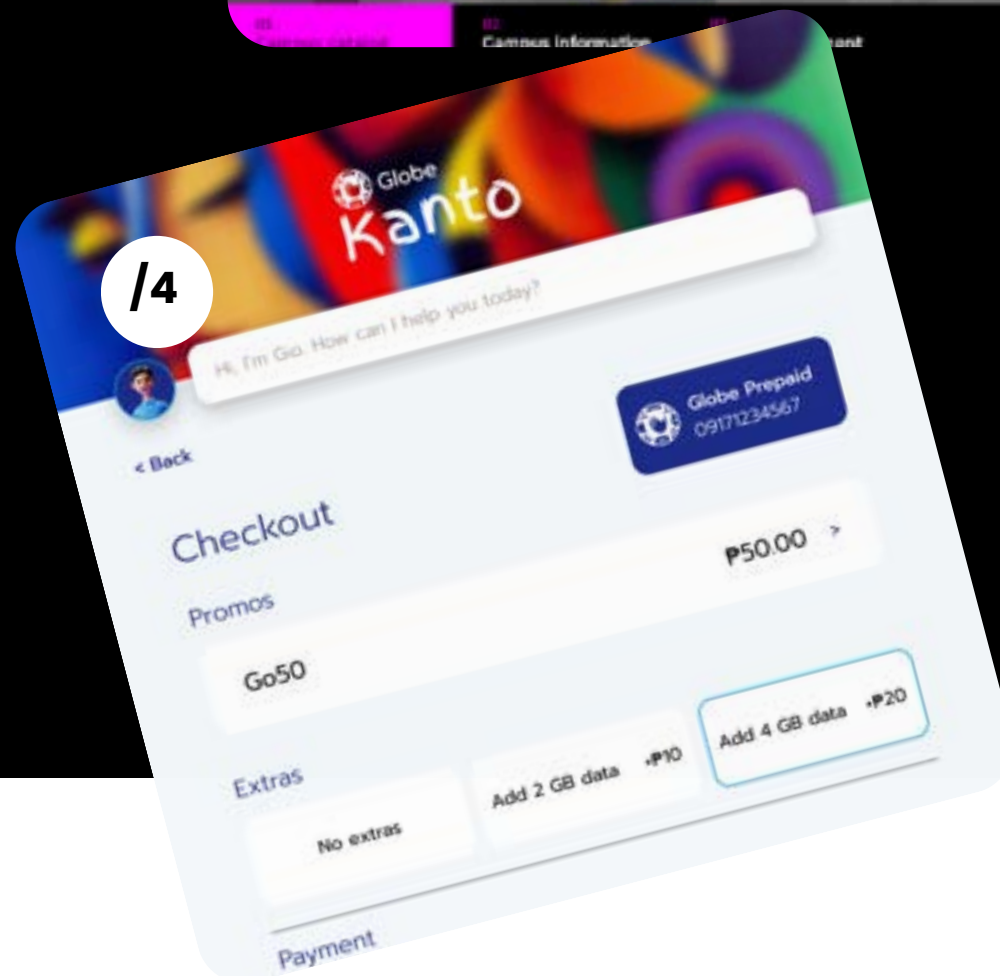

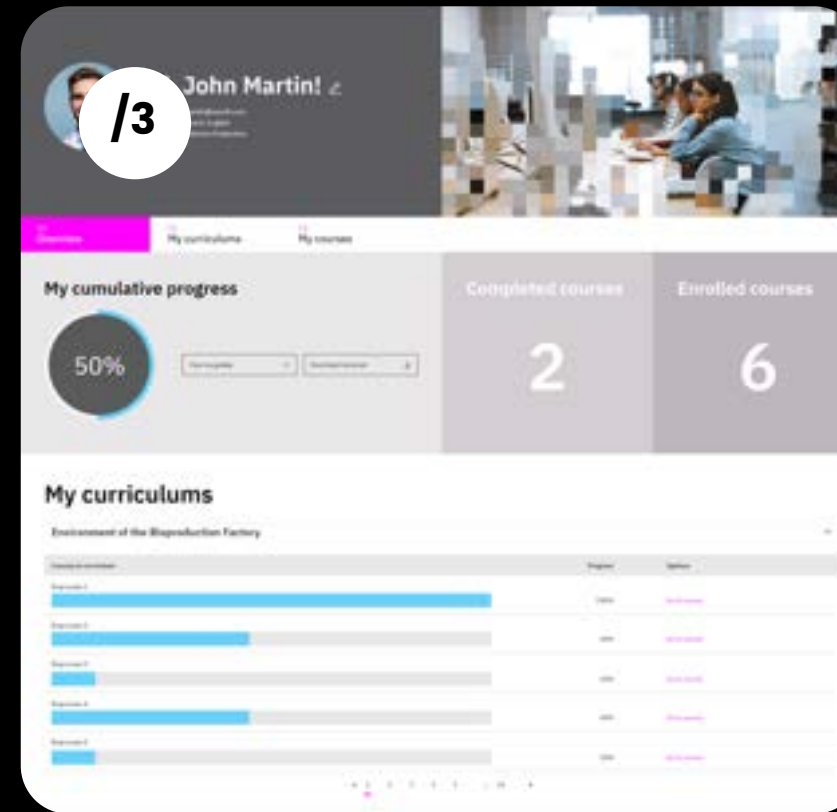

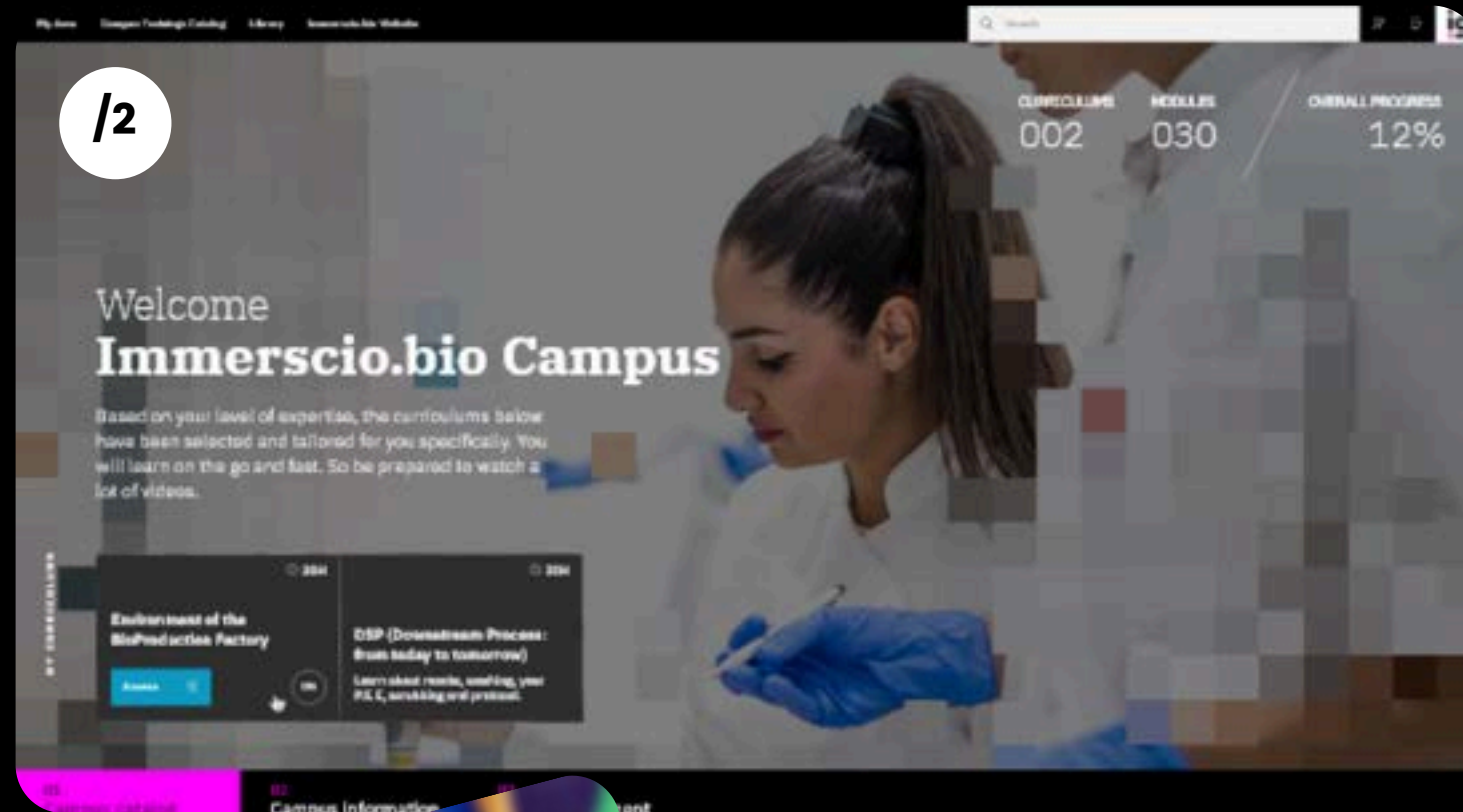

/1 Left: Immercio.bio, an online learning platform for bioproduction training during the pandemic. Right: Globe Kanto, a service design concept to connect communities to the internet.

Projects

Raffy Orbe

/2 WCAG-compliant (RGAA) version of the Immerscio.bio design. A compromise had to be made with the client on the use of brand colors for accessibility.

/3 Initial curriculum progress dashboard of Immerscio.bio

/4 Transaction experience of Globe Kanto, emulating the telco store experience at the community's corner (kanto) convenience store.

/5 Helper AI chat bot concept within the Globe Kanto experience, emulating an in-store associate.

Need a skill check?
Happy to work on a skills challenge!

Globe's GFiber Prepaid grows 74%, accelerating fiber transition

Telecommunications

Globe Telecom

SHARE

February 25, 2025 • 2:00PM PHT

Globe Telecom's GFiber Prepaid is now the fastest-growing prepaid fiber brand in the Philippines, hitting 260,000 subscribers in the fourth quarter of 2024—a massive 74-percent surge from the previous quarter.

The demand for affordable, flexible prepaid fiber is fueling GFiber Prepaid's rapid growth.

With reload rates at 78 percent, the highest among prepaid brands, and an impressive Net Promoter Score (NPS) of 68 percent, customers are showing strong satisfaction and engagement.

PRESS RELEASE

Paris, 27 May 2021

The Campus Biotech Digital joins forces with Atos, IBM and Microsoft to develop a unique training platform

Another step forward in an innovative and structuring project for the French bioproduction sector

"Supported by the Investments for the Future Programme"

The Campus Digital Biotech receives funding under the "engineering of vocational training and innovative offers" component of France's Investments for the Future programme. Launched in December 2020 and run by a leading industrial consortium (bioMérieux, Novasep, Sanofi and Servier), the Campus is partnering with three major players in the digital sector: Atos, IBM and Microsoft. These partners will be working with the Campus to develop an unprecedented bioproduction training platform.

"This alliance with leading digital partners ties in perfectly with the construction of a rich and innovative ecosystem to train future talent for the bioproduction sector in France."

Karim Vissandjee, General Manager of the Campus Biotech Digital

PRESS RELEASE

April 7, 2022

French bioproduction sector announces launch of world first: **immerscio.bio** – a platform for training the talent of tomorrow

An innovative campus helping professionals and young graduates develop their skills

Winner of 2030 Plan France

The French bioproduction sector – in the form of a top-tier industrial consortium led by bioMérieux, Novasep, Sanofi and Servier – announced the launch of **immerscio.bio** at the France Bioproduction 2022 Congress on April 7 and 8. **immerscio.bio** will cover the entire bioproduction chain, employing a range of innovative digital solutions to promote the understanding of processes and the ownership of professional practices.

Some nice words

Feedback is a gift. Good feedback keeps me motivated and driven. Not-so-good feedback helps me learn and grow. Here are some good things my bosses have said about me.

Commendations

Raffy Orbe

Colby Hepner, NYU

Participation in our programs and opportunities has grown significantly thanks in large part to his efforts. What sets Raphael apart is not only his technical skill but also his leadership and generosity.

From LinkedIn recommendations

David Hoffman, IBM

Raffy is a talented designer and has been behind some of our amazing client designs.

From an all-hands announcement

Mark Diaz, IBM

I would like to recognize Raffy's eagerness to take on stretch assignments and his willingness to go above and beyond to support the team.

From my 2022 annual performance review

Essential is the human potential

To empower
people and organizations
through products and
experiences that expand
the human potential
